PROFESSIONAL SUMMARY

Data-focused Engineer with a Master's in Computer Science and hands-on experience in building scalable data pipelines and machine learning solutions. Proficient in Java, Python, and SQL, with expertise in database optimization, dimensional modeling, and cloud-based architecture. Passionate about leveraging Google Cloud Platform to transform complex, raw data into actionable business insights.

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL, JavaScript.
- **Data Engineering:** ETL/ELT Pipeline Development, Dimensional Data Modeling, SQL Query Optimization, Database Partitioning, Backup & Recovery.
- **Cloud & Tools:** Google Cloud Platform (GCP), Vercel (CI/CD & Deployment), MySQL, OpenCV, Spring Boot.
- **AI/ML:** Machine Learning Modeling, NLP, Feature Engineering, Data Preprocessing.

PROFESSIONAL EXPERIENCE

Product Management Fellow | PM Accelerator

- Designed AI-driven UX solutions, utilizing data-informed decision-making to enhance user engagement and system throughput.
- Collaborated with cross-functional engineering and product teams to translate business requirements into technical data specifications.

Machine Learning Intern | Manac Infotech Pvt. Ltd.

- Architected a hybrid AI system for detecting suspicious financial transactions and generating automated risk summaries.
- Optimized database performance by tuning complex SQL queries, directly improving data retrieval speeds.
- Executed large-scale data preprocessing and feature engineering to ensure model accuracy and pipeline reliability.

AI Intern | Pantech E-Solutions

- Developed Python-based image processing pipelines using OpenCV to manipulate large datasets of image matrices.
- Documented technical workflows and performance metrics, ensuring system stability and reproducibility.

TECHNICAL PROJECTS

MedisyncAI | AI Solution Developer

- Engineered backend architecture and data integration layers for a health-tech diagnostic platform.
- Managed database design and synchronization logic to handle complex medical datasets while ensuring data integrity.
- Deployed the solution via Vercel, implementing CI/CD practices for seamless updates and high availability.
- Integrated machine learning models to generate clinical insights, balancing data-intensive processing with user-friendly interaction.

AI Resume Analyzer | Full-Stack Developer

- Designed the backend using Spring Boot and MySQL, implementing data modeling to store and retrieve candidate records efficiently.
- Utilized Natural Language Processing (NLP) to extract structured data from unstructured resumes, optimizing workflows for high-speed technical recruiting.

EDUCATION

- **AI Solutions Engineer** – Per Scholas, Austin, TX (March 2026 – June 2026)
- **Full Stack Java Developer Bootcamp** – Per Scholas, Austin, TX (Graduated March 2025)
- **Master of Science in Computer Science** – Osmania University, India (Specializations: AI, ML, Deep Learning, and NLP)
